

"It's Always STAR When Good Fellows Get Together"

Men Who Chew Are Men Who DO

THE men who built the Panama Canal—thousands of robust, clear thinking, quick-acting workmen, and hundreds of skilful, far-seeing engineers—made thinking easier and labor lighter by chewing tobacco while at work.

For many years men from other countries—non-tobacco chewing men—tried to build the Panama Canal. They couldn't stand the strain, their machines "fell down" at critical moments—their best attempts failed. Our American men tried—men who are "chewers and doers." They built the Panama Canal.

Men who work with a pick or a pen; on steam-rollers or skyscrapers, chew and boost STAR TOBACCO, THE THICK, TASTY PLUG.

STAR is the leading brand of the World. A year's output would build a road of STAR plugs, 23 feet wide, along the entire route of the Panama Canal, and there would be over 200,000 one pound plugs left over!

The Quinine That Does Not Affect The Head
Because of its tonic and laxative effect. LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE, 2c.

RULES AND REGULATIONS

Governing the Production and Sale of Dairy Products.

Oklahoma City, April 19.—The following rules governing the production and sale of dairy products, and sanitary conditions of public dairies, creameries, cream stations, ice cream factories, cheese factories and other places where dairy products are kept for sale, were approved by the Oklahoma state board of agriculture on March 15, 1915:

"Rule 1.—Public dairies must keep their cattle in apartments separate from other stock such as horses and hogs. All stables must be sanitary and clean, well ventilated and lighted. All dairy barns must be cleaned and aired before cows are milked.

"Rule 2.—Milk from all diseased or suspected milk cows is absolutely prohibited to be offered for sale, and all animals giving such milk must

be separated from the rest of the herd. All barns and stalls where dairy cows are kept must be white-washed every four months and sprinkled with air-slacked lime at least once a week.

"Rule 3.—Water for dairy cows must be fresh and free from filth. The use of stagnant pond water or other stagnant water is prohibited. Milk shall not be sold from cows fed on wet distillery waste or other unhealthful feed or waste products.

"Rule 4.—All dairy cows furnishing milk for public dairies, when said milk for public dairies, when said retail, shall be tuberculin tested, and such cows as show reaction to this test shall be rejected from the herd.

"Rule 5.—When suffering from any disease, no milk shall be permitted to come near the cows or dairy house where milk or other dairy products are kept. The wearing of filthy clothes by milkers, while milking, is prohibited.

"Rule 6.—If any milk appears to be bloody, stringy, unnatural or abnormal during milking, the whole milking must be rejected.

"Rule 7.—The long hair must be kept clipped from the flank and udder of the cows. The milk must be removed as soon as possible from stable to separate room or milk house, which shall be screened, and cans must not be allowed to stand or remain in stable while being filled.

"Rule 8.—All milking must be done with a sanitary covered milking pail and the milk must be strained through a metal gauze strainer and one or two layers of clean cloth, or at least through two layers of cloth as soon as drawn. Cool milk as soon as possible.

"Rule 9.—All sweet milk and cream which is retailed by public dairies in towns and cities must be delivered in clean bottles which have been filled and capped at the dairy.

"Rule 10.—All milk utensils shall be made of metal and all joints must be smoothly soldered. Rusty cans and utensils must be set aside. All dairy utensils must be thoroughly washed and cleaned with hot water and cleansing powder before using. After cleaning, all utensils shall be inverted and aired in the sun if possible.

"Rule 11.—A cream receiving station shall be a separate room or building and milk or cream shall not be received or stored in the same apartment at any station where chickens, fruits and vegetables, kerosene, or

other supplies of general merchandise are kept, from which odors may arise.

"Rule 12.—All vats, churns, workers, printers, separators and other utensils must be thoroughly cleaned and scalded after using.

"Rule 13.—All nuisances, such as barns, pig pens, etc., which are likely to produce offensive odors, must be kept at a reasonable distance from creameries and dairies.

"Rule 14.—All sewage from dairies, creameries and ice cream factories, must be disposed of by way of sewers or by other sanitary means, and not allowed to collect in pools about the building."

WILSON CALLS MEETING

Superintendent to Hold Conference with Different Superintendents.

Oklahoma City, April 19.—State Superintendent R. H. Wilson has called a conference of the superintendents of all independent school districts, cities and towns which maintain four year high schools, to meet with him here Thursday, April 22nd. The purpose of the meeting is to discuss the law (senate bill No. 364) which provides that graduates of four year high schools and the secondary agricultural schools may be granted teachers' certificates upon the completion of certain prescribed courses and to confer with the superintendents upon plans for putting its provisions into effect. Superintendent Wilson, with the education committee of the state board of agriculture, and all the presidents of the district agricultural schools, have worked out the plans affecting the agricultural schools. The presidents of these schools and the entire board of agriculture expressed themselves as being in hearty sympathy with this law.

Superintendent Wilson in commenting on the purpose of this law, said: "Progressive school men realize the importance of standardizing the teaching profession. It is admitted by all that an examination is not a true test of ability to teach, and the interests of the schools demand that certification of teachers be based upon scholarship and professional training. I recommended this measure to the legislature, and the fact that it passed without amendment indicates that there is a general demand for the law and insures a successful and popular enforcement of its provisions."

A Cure for Sour Stomach.
Mrs. Wm. M. Thompson, of Battle Creek, Mich., writes: "I have been troubled with indigestion, sour stomach and bad breath. After taking two bottles of Chamberlain's Tablets I am well. These tablets are splendid—none better." For sale by all dealers.

APRIL 19 IN HISTORY.
1774—Edmund Burke made his speech against taxing the colonies.
1782—Holland acknowledged independence of the United States.
1865—Lincoln funeral service at Washington.
1889—Plot disclosed to blow up czar of Russia.

Whooping Cough.
Well—everyone knows the effect of pine forests on coughs. Dr. Bell's pine-tar-honey is a remedy which brings quick relief for whooping cough, loosens the mucous, soothes the lining of the throat and lungs, and makes the coughing spells less severe. A family with growing children should not be without it. Keep it handy for all coughs and colds. 25c at your druggist.

The Devil and the Deep Blue Sea.

Two men walking across the lone prairie one day were suddenly confronted to find a mad bull bearing down on them, with blood in his eye. There was only one tree in sight, and without stopping to exchange formalities, both of the men made for the tree with all possible speed. Naturally one beat the other to the lone haven, and shinned up it. The tree was only a small one; the less speedy traveler could see no place left for him to sit in; and meanwhile the bull was still coming on. There was no time to be lost. The traveler on the ground spied a hole in the earth just in time, and as he dived into it the bull charged over the spot, just missing the man's coat tail by a hair's breadth. But no sooner had the bull charged on a few paces than the man in the hole appeared on the surface again, with a look of despair in his eyes. The bull, seeing his victim, forthwith charged again, and for the second time just missed the man as he scurried down in the hole. Again the bull turned and as he did so again the man in the hole came out in the open. His friend in the tree was watching these proceedings interestedly, but somewhat disgustedly. This was too much. As his friend came out for the second time he called to him: "Hey, yo adarned fool! Why don't you stay in the hole?" "Darned fool nothing!" answered his companion wildly. "There's a bear in that hole!"

BAD BREATH

Dr. Edwards' Olive Tablets Get at the Cause and Remove it

Dr. Edwards' Olive Tablets, the substitute for calomel, act gently on the bowels and positively do the work. People afflicted with bad breath find quick relief through Dr. Edwards' Olive Tablets. The pleasant, sugar-coated tablets are taken for bad breath by all who know them.

Dr. Edwards' Olive Tablets act gently but firmly on the bowels and liver, stimulating them to natural action, clearing the blood and gently purifying the entire system.

They do that which dangerous calomel does without any of the bad after effects.

All the benefits of nasty, sickening, gripping cathartics are derived from Dr. Edwards' Olive Tablets without griping, pain or disagreeable effects of any kind.

Dr. F. M. Edwards discovered the formula after seventeen years of practice among patients afflicted with bowel and liver complaint with the attendant bad breath.

Dr. Edwards' Olive Tablets are purely a vegetable compound mixed with olive oil, you will know them by their olive color.

Take one or two, every night for a week and note the effect. 10c and 25c per box. All druggists.
